LETTER OF RECOMMENDATION

This is with reference to the application for admission, sent in by Ms. Yami Naik for the master's program at your prestigious university. It gives me immense pleasure to write a recommendation letter for Yami. I have known her since 2019 and have taught her Database Management System and Advance Micro Processor Architecture in the fifth semester.

She took a keen interest in the subject and demonstrated high intellectual ability. Her analytical mindset enabled her to approach problems from a different point of view. Also, her work reflects a strong grasp of theoretical concepts as well as her ability to apply them effectively. Besides, she regularly attended lectures and has been an attentive and enthusiastic participant in the class. She often raised logical questions in terms of doubts. A quick learner, she has great leadership skills and is a highly enthusiastic learner. She developed an Online Election Portal under my supervision where the entire election is managed using Database System.

She not only has a good academic performance, but she also contributed to various team activities that helped her enhance her leadership qualities as well. She performed well in class and submitted all of her assignments on time. To add to this, her pleasant personality and ability to efficiently handle every task assigned to her make her stand out from the crowd. Besides, effective communication skills, she also has admirable presentation skills. She actively participated in our cultural week and gave many dance performances. She also participated in a movie-making competition. She demonstrated good confidence and the ability to present herself through these activities. Additionally, she was a part of the Women's Committee under which she helped organize self-defence seminars and gave welcome speeches.

To conclude, she is a talented and hardworking student and I believe that she will be an asset to your university. I thus most certainly recommend her for admission. With the right guidance and training, I am sure she will excel in any program. I would be glad to provide any further information required to assess her candidature.

Sincerely,

Prof. Sunil K. Vithlani
Assistant Professor
