## Letter of Recommendation

I am pleased to recommend my student, Ms. Yami Naik for admission to the graduate program of her choice. I have known her for the last two years and have supervised her final semester project. Along with this, I have taught her the subjects of Computer and Communication Network in the 4th semester and Design and Analysis of Algorithm in the 5th semester. Over the years, I have witnessed her grow into a mature and competent individual who performed exceptionally well during her undergraduate studies.

Yami is an enterprising student who is keen to enhance her technical knowledge in the field of her interest. Apart from actively participating in class discussions and contributing immensely with meaningful insights, she has also performed confidently in projects and assignments. I have witnessed her efficiency in solving problems using her understanding of the concepts taught in class. She has developed a Book Recommendation System under my supervision in a group of two using Python-Django and Machine Learning. She created this system along with e-commerce where people can buy books, get a recommendation and leave comments which would be filtered to help other users get insights about the book.

Besides academics, she has participated enthusiastically in various co-curricular activities and events. Through these, Yami exhibited strong leadership skills, time management, teamwork abilities, and communication skills. She is a hardworking student and performed quite well in my class. She is also punctual and completed all her tasks on time.

Her zealous efforts, determination, and willingness to delve deeper into the field of her interest have motivated her to apply to the graduate program at your esteemed university. She is deeply committed to her goal and is working with single-minded devotion towards this. I am sure that she will prove her mettle as a graduate student, and I highly recommend her for admission to the program at your university. I wish her success and luck in all her future endeavours.

Sincerely,

Prof. (Dr.) Mukesh M Goswami  
Associate Professor
