LETTER OF RECOMMENDATION

Ms. Yami Naik is an applicant to the master's program at your university. It gives me immense pleasure to recommend her. She joined our organization as a Front-end Developer on 3rd May 2021. During the three months of her internship, I have closely supervised her work. Yami is willing to work above and beyond the call of duty. I have recognized her as a talented individual willing to work hard to reach higher levels of excellence.

During her tenure, she worked on our live project which was a kind of customizable, centralized, and integrated ERP for managing cooperative society operations effectively. Her responsibilities included troubleshooting daily issues that might come in our live projects and developing whatever the clients required in our ongoing project. We were all quite impressed by her as in a short span of time, she learned a lot of things and implemented them successfully. She also completed all her tasks on time.

Moreover, while working on the projects, she emerged as a strong team member of her group and communicated effectively with the staff members to get work done. Her interpersonal skills were highlighted as she worked in harmony with everyone in the group and also with the people who guided her. She demonstrated tremendous energy and enthusiasm while working and was truly a valuable asset here. What impresses me most about Yami is her desire to gain knowledge and the will to do well, which is evident in discussions wherein she consistently offered a fresh perspective and creative approach in handling projects. She is constantly looking for new challenges, skill-building, and developing a resourceful network of colleagues that respect and admire her.

Considering her potential, aptitude, and keenness to learn, I feel that she is an ideal candidate for a challenging graduate program. I strongly endorse her application for admission to your esteemed institute and I am confident that she will prove her mettle at your university. I would be glad to provide any further information required to assess her candidature.

Sincerely,

Dr. Chintan Naik
